

Application Description

DUST REMOVAL SLITTING REWINDING PROCESS

Xstream 4.0 network capable web cleaning system

Application Information
DUST CONTROL

Application Description

Pharmaceutical film for packaging to be cleaned during slitting rewinding process!

For product quality reasons, the substrate must be cleaned and neutralized. The Xstream system ensures a non contact cleaning efficiency of close to 100% down to $1,5\mu\text{m}$ particle size. The extreme high velocity air flow guarantees best results even at highest line speeds.

Key Features:

- 100% clean down to $1,5\mu\text{m}$
- Up to 2.000m/min web speed
- Fully automated AUTODC ionisation iONstream 4.0
- All parameters and system efficiency visualized

Our product is ideal for many slitting rewinding processes:

- Film
- Paper
- Nonwoven
- Tissue
