

Application Description

DUST REMOVAL TEXTILE COATING

Xstream high velocity
non contact surface
cleaning technology with
AUTO DC Technology®
ionisation system

Application Information
DUST CONTROL

Application Description

During the special textile coating process it is absolutely essential that the substrate is 100% clean prior to coating. Any remaining dust or particles would be trapped inside the coated layer and have a massive negative effect of the functionality of the textile. Our Xstream technology guarantees a non contact cleaning for this process with outstanding efficiency.

Key Features:

- Any textile material
- 95% cleaning down to $1,5\mu\text{m}$
- Fully automated including AUTODC ionisation
- All parameters and system efficiency visualized

Our product is ideal for many substrates:

- Film
- Paper
- Cardboard
- Tissue
- ... and many more
